

Additional sections based on the type of trial:

14. In case of an additional (bio)sample is taken for further study:

14. *I and my [legal guardian] have been told that an extra sample [what] is collected in this study. The sample is collected [how]. I give permission to collect and store an extra sample. [legal guardian] gives me permission to give this sample for further studies.*

YES NO

15. The following section can be added, if it is possible to inform the child about the trial results after the end of the trial:

15. *When the study ends, me and my [legal guardian] will be told what new information was found out. We will also be told, how this information helps other children with the same disease.*

16. A biobank sample, if a separate biobank sample is requested/added in the trial. A separate consent must be signed per biobank in case.

[This kind of consent can be added in the same consent form when it is requested from the subject and the legal guardian, and the guardian confirms consent. Please note that if consent for a biobank sample is requested separately from the trial, it must be told that it is not connected to the trial and a completely separate consent form needs to be used].
